REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Applicant's arguments in the appeal brief were persuasive and have overcome the previous final rejection. None of the newly cited prior art suggests the instantly claimed invention with a TCF or ECF bleached cellulose solution having a carboxyl group content in the instantly claimed range. Although the references to Jaschinski, Jaschinski et al., McCreight et al., Jewell et al., Chen et al., and Weerawarna et al. each discuss the carboxyl content of bleached cellulose, none suggest minimizing this content; Jaschinski et al. teaches the benefits of carboxyl groups for enhancing dry strength (paragraph 0046).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
